- Strong visual design skills and background designing for systems (style guides, design patterns)
- Ability to generate pixel-perfect assets
- Strong knowledge of front end technologies to communicate effectively with engineers
- Able to write HTML 5 / CSS 3 code
- Experience in ecommerce
- Experience in one page web application
- Passion for anything design

APPLICATION DETAILS

Cover Letter

Hey, i'm Denys from Kyiv (Ukraine).

i'm 29 have a great family - my wife and my daughter (cat and dog lover :)
Working as UI UX Designer last 5 years, working on iMac / Macbook pro and fluent with Adobe CC suite, Sketch3 (prefer it more), like using invisionapp for prototyping and collaborating.

I start learn coding HTML / CSS / JS this summer (Treehouse / codecademy) and always open to new information, read design related blogs, watching videos and of course deep thinking person.

Before this i worked in 7 years Tourism field in positions: CMO, CEO and know how business works, and understand many business tips.

You may ask why i'm here as UI / UX designer ?

I'm just loving this, love solve problems and help users. Design is my passion, really.

This starts when i hear our team was really unhappy using our internal app when i was CMO. Then i want to help them by improving user experience using my feelings and our 2 devs :) and i fall in love in this. And then this made design my hobby, and after that hobby became my work.

Here is some of my works:

<https://dribbble.com/usabillla> - not too much - more things under NDA, sorry. And i didn't do fake designs for posting.

<https://www.acinteract.com>

www.chatbox.com

www.centralpark.com - soon will be published updated version (Really proud i made UI & UX for the greatest park - heart of NYC).
